# Our Approach

We are not just another firm of number crunchers. Our skills and services go beyond what your typical accountant offers.....

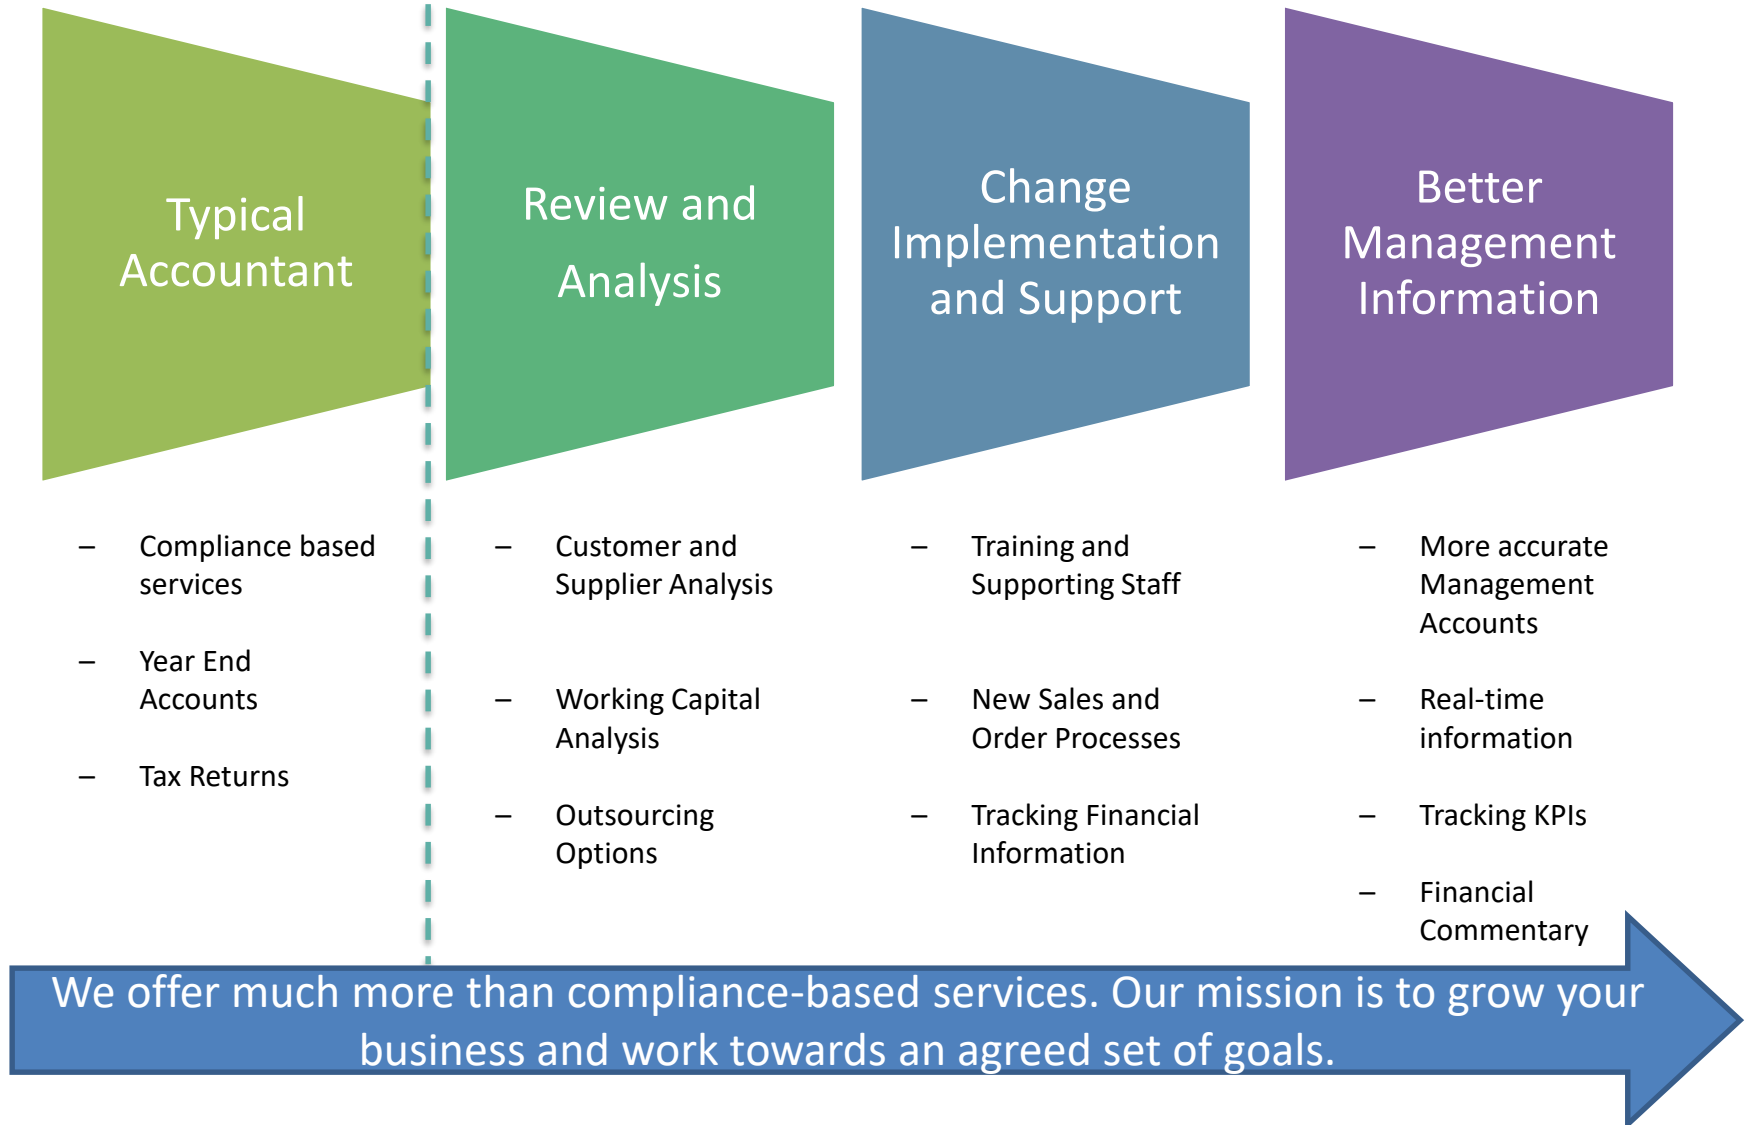

This is an ideal solution for businesses who don't need or want a full-time Finance Director.....

...and still need high level expertise and leadership in their Finance Department.

This service is particularly suitable in fundraising (to obtain the funding) and post fund raising scenarios (to manage the deployment of funds).

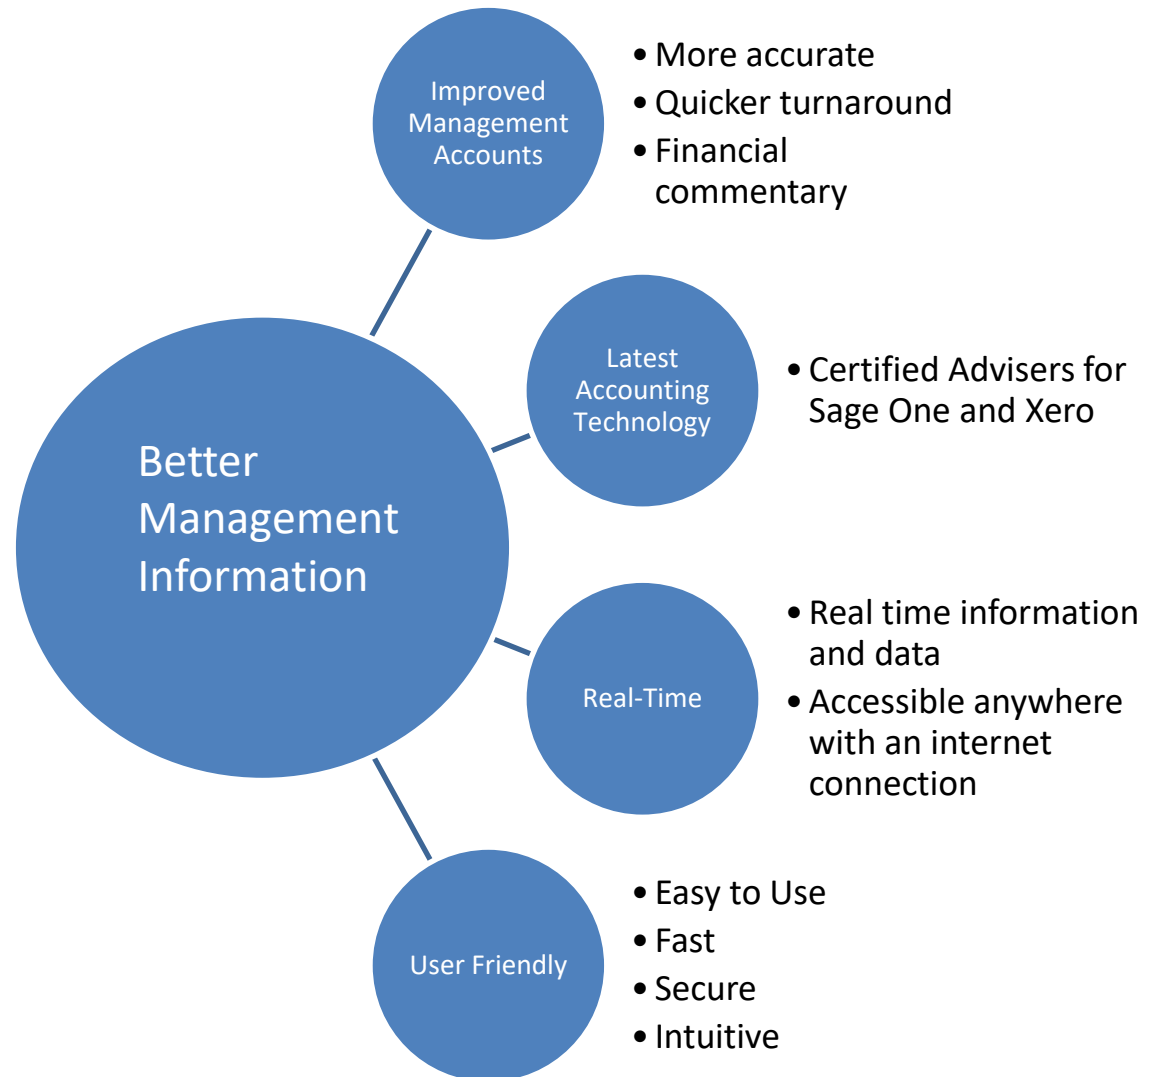

Cloud accounting technology has advanced significantly over the last few years.

We work with the “best in class” providers, Sage and Xero...

..so you can fully benefit from this step change in accounting technology.

However, there is no need to switch accounting systems if you want to work with us.

We have strong relationships with a large network of funders.....

- Private Equity
- Venture Capital
- Banks
- Asset Based Lenders

...so we know what they are looking for...

- Identifying the most suitable funders
- Understanding the funding criteria
- Providing funders with quality and timely financial information

...and can get your business ready for investment.

We have a track record of success and experience in many sectors....

...and can offer you a wide variety of services...

..but will tailor our work to suit your goals and budget.

We're also specialists at valuing SMEs.....

.....and have the relevant research capabilities to cover any sector.

We use a range of valuation methods (Comparable Transactions, Comparable Companies and Discounted Cash Flows).....

...to prepare a quality valuation report at a fair price.

## Free Meeting Every Business is different
